subject: Information REACH Regulation

The Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) addresses the production, marketing and use of chemical substances and mixtures. We deliver **COBRA® QUICK RELEASE click buckles** which contain the following individual components made of copper alloys: clips. According to the REACH regulation, our products are manufactures. In accordance with article 33 of the REACH regulation, suppliers of manufactures must inform their customers if the delivered manufacture contains a chemical of the REACH list for substances of very high concern (SVHC list) in concentrations over 0,1 mass percent. On 27.06.2018, lead (CAS: 7439-92-1 / EINECS: 231-100-4) was added to the SVHC list. This addition causes an information obligation in the supply chain. Therefore, we want to inform you that the abovementioned individual components of our manufactures are made of copper alloys which contain lead in concentrations over 0,1% to a maximum of 0,5% mass percent. The hazardous substance rating, measures for the safe use of lead and the application range of our products remain unchanged. Manufactures made of copper and copper alloys are not included in the scope of the Regulation (EC) No 1272/2008 of the European Parliament and the Council on the Classification, Labelling and Packaging of chemical substances and mixtures (CLP Regulation) and are therefore not subject to the obligation of rating and labelling.
